FURNACES FOR CAL AND CGL
NEW DESIGN - FOR THE LATEST ADVANCED HIGH-STRENGTH STEELS

DYNAMIC WIDTH ADJUSTMENT PRINCIPLE

These unique furnaces for continuous annealing lines (CAL) and continuous galvanizing lines (CGL) feature technologies that introduce great flexibility to produce the most advanced steel grades for use in the automotive industry.

MAIN BENEFITS

• Heat strip to 950°C
• Atmosphere controls for improved wetability of higher alloy substrates
• Flexible exit section for complex thermal cycles

The information (including, e.g., figures and numbers) provided in this document contains merely general descriptions or characteristics of performance based on estimates and assumptions which have not been verified. It is no representation, does not constitute and/or evidence a contract or an offer to enter into a contract to any extent and is not binding upon the parties. Any obligation to provide and/or demonstrate respective characteristics shall only exist if expressly agreed in the terms of the contract. These estimates and assumptions have to be analyzed on a case-to-case basis and might change as a result of further product development.

Primetals Technologies excludes any liability whatsoever under or in connection with any provided information, estimates and assumptions. The provided information, estimates and assumptions shall be without prejudice to any possible future offer and/or contract. Any use of information provided by Primetals Technologies to the recipient shall be subject to applicable confidentiality obligations and for the own convenience of and of the sole risk of the recipient.
